INSTRUCTIONS

Prepare the floor according to the technical data sheet for the lacquer. Add the hardener to the lacquer at a ratio of 1:10 (one bottle of hardener to one can of lacquer). Shake or stir the mixture for 1 minute and let it rest for another 10 minutes before application. Do not reseal the can after mixing. Mix only as much as you will need per layer. Once the hardener is added, you cannot store and reuse the lacquer. Apply the lacquer as instructed on the technical data sheet for that lacquer. Drying times between coats, and time until first use of the floor (24 hours), are not affected by the addition of the hardener.
